

Serial No.: 09/ 539,834  
Response to Office Action mailed December 13, 2004  
April 6, 2005

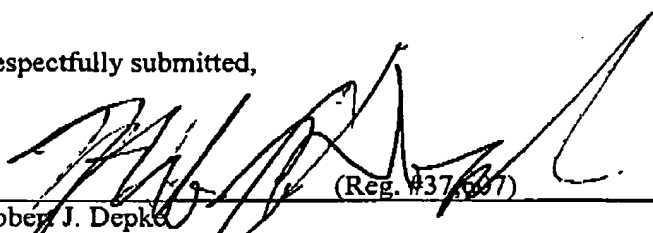

**REMARKS**

Applicants thank the Examiner for the courtesy of the interview during which the prior rejections were discussed. Applicants also thank the Examiner for withdrawing the finality of the last office action. Consistent with the discussions held, Applicants have herein modified the claims to further highlight the relative motion feature between the funnel and the package template cavities. More specifically, Applicants have modified the independent claim to further require that the relative motion be in two dimensions which are generally perpendicular, and that it is through this motion that each of the package template cavities are filled with one or more solid products.

In light of the foregoing, Applicants submit that all claims now stand in condition for allowance.

Respectfully submitted,

Date: 4/6/05
